

Où publier / Where to Publish paves the way for the recognition of reviewing at Cirad

●● Où publier is a French language database on scientific journals in life sciences, social sciences and engineering sciences applied to agriculture

↳ **On the website**, authors search for the journal best suited to their scientific field. They refine their search by subject, journal's reputation, open access status, article type, publication costs and language

↳ **Through a restricted access**, authors from CIRAD

- access the latest CIRAD articles published in the journal
- view the journal impact factor
- display CIRAD reviewers and/or members of an editorial board

●● Où publier highlights CIRAD editorial contributions to journals

- for a journal, the names of CIRAD **reviewers** are displayed (member of an editorial board or reviewer)
- CIRAD **reviewers** identify the journals to which they contribute
- authorised users identify CIRAD **reviewers** and the journals to which CIRAD participates

●● Où publier helps produce indicators on CIRAD researchers' reviewing

- number of journals with at least one CIRAD **reviewer** and/or editorial board member
- number of researchers at CIRAD who are **reviewers** and/or editorial board members

Southern Forests

National Inquiry Services Centre (Afrique du Sud)

Présentation
Southern Forests: a Journal of Forest Science is one of the leading forestry journals in the Southern Hemisphere. The journal publishes scientific articles in forest science and management of fast-growing, planted or natural forests in the Southern Hemisphere and the tropics. Papers are also encouraged on related disciplines such as environmental aspects of forestry, social forestry, agroforestry, forest engineering and management as well as the goods and services that are derived from forests as a whole. Articles published by the journal are of value to foresters, resource managers and society at large. The journal particularly encourages contributions from South America, Africa and tropical/subtropical Australasia and Asia. Publication of the journal is supported by the Southern African Institute of Forestry.

Thème(s)
Gestion et production forestières

In conclusion, *Où publier*, a first step towards the recognition of reviewing at CIRAD

To go further?

- include **reviewing** in the evaluation of researchers' work
- encourage CIRAD journals to promote **reviewers**
